

Dear Parents and Students

Greetings of the Day!

Hope you and your family are doing well. Like all of you, I have been intently following reports of Coronavirus Disease 2019 (COVID-19). These past few weeks have been a powerful reminder of just how connected we are to one another—and how our choices today determine our options tomorrow. I appreciate our students' understanding and willingness to adapt to remote learning. Since March 26th all classes have been delivered online to the greatest extent possible.

College is aligned with the University in our planning for the coming semester and examinations. Teaching as you all know, we have been successfully executing it by conducting online classes. We are working to make this transition as seamless as possible for our students, this is a major shift for both faculty and students of the College. We are focused on ensuring that our students shall continue to receive a first-rate education, albeit in a new way.

During this lockdown, we are confident to sustain digital learning plans and move towards a long lasting, robust plan to teach more effectively. I am happy to share with you that we shall be launching <http://BvrithVidya.in> a learning platform soon to the students which has advance features compared to the existing moodle platform. Very soon we shall be launching campus radio as well which is used to communicate campus notification besides engaging students with learning activities during the ongoing lockdown.

For regular updates and any information about how the college will be operating can be found on our official college website. As of now college remains closed till 17th May 2020. We shall keep it updated as soon as any university-level decisions are made related to commencement of semester or conduction of examination.

I urge both parents and students to follow Government guidelines in response to the coronavirus pandemic. Kindly follow the instructions related to self-isolation and social distancing. By doing so, you are not only protecting your own health and that of people you live with, but you are also playing your part in reducing the impact of the virus on vulnerable people.

I understand that these are difficult circumstances, but it is imperative that we all do our part to “flatten the curve” and keep ourselves safe. Failure to comply shall put all of us at risk. Stay home, stay healthy and upskill yourself.

Thank you and take care
Dr KVN Sunitha
Principal
