About the Speaker:

High performing management professional with an MBA from JBIMS. Experience of 20+ years in education, consulting and marketing including 10+ years in program management. Excellent understanding of the educational landscape in the Asia- Pac region. Very good at building partnerships and engagements. Proven ability of collaborating across functions and stakeholders across geographies and time zones. Good connections in education and expert knowledge in this sector. Understanding of the gaps in the sector and the potential available.

In my current role, I have been responsible in leading the growth of the academic program from a small presence to a large presence in India and the Asia-Pac region. I handle multiple responsibilities in my current role from running marketing campaigns, events, workshops, relationship building etc. The opportunity to lead this program and impact a few thousand students and professors in making them skill ready in data analytics is a humbling experience.

In personal life, I undertake community development in rural areas of Maharashtra on a regular basis.

Clifton strengths: Futuristic, Positivity, Input, Learner, Connectedness

I am also a sportsperson and consistently work on my fitness as my passion. I am a Triathlon Ironman 70.3. The qualities I have imbibed due to sports are discipline, determination, a positive frame of mind and a cheerful disposition.

Description of the Event:

Data visualization is the graphical representation of information and data. By using visual elements like charts, graphs, and maps, data visualization tools provide an accessible way to see and understand trends, outliers, and patterns in data.

Guessing game with students is an interactive part of session.
