Brief write up:

1. English for Engineers:

Activities are employed to explore English Language Skills. In English theory class, all students are divided into six groups consisting of 10 members in each group. Whereas the unit will also be divided into six parts, which are being explained by six groups of students. The faculty facilitates, give nutshell of the unit and gives feedback to each student of her highlighted points and areas to be improved. This collaborative activities helps students to improve soft skills such as- confidence, team building, coordination, cooperation, leadership, assertive, communication etc.

2. English Language Communication Skills

English language laboratory is aimed to improve speaking and listening skills, which are essential for placements. To improve the skills various activities like- Jam session, pair word, situational dialogue, role-plays, oral presentation, group discussion are conducted.
