Event Report

Event: "Awareness session on **SAVE WATER SAVE EARTH** "

Date: 26th & 27th April, 2024

Duration: 1 Hour

Number of participants: 150

Faculty Coordinator: T.Mounika

Report :

The "Save Water, Save Earth" awareness session was conducted to educate hostel students about the significance of water conservation and its impact on the environment. The session aimed to inspire students to adopt water-saving practices in their daily lives.

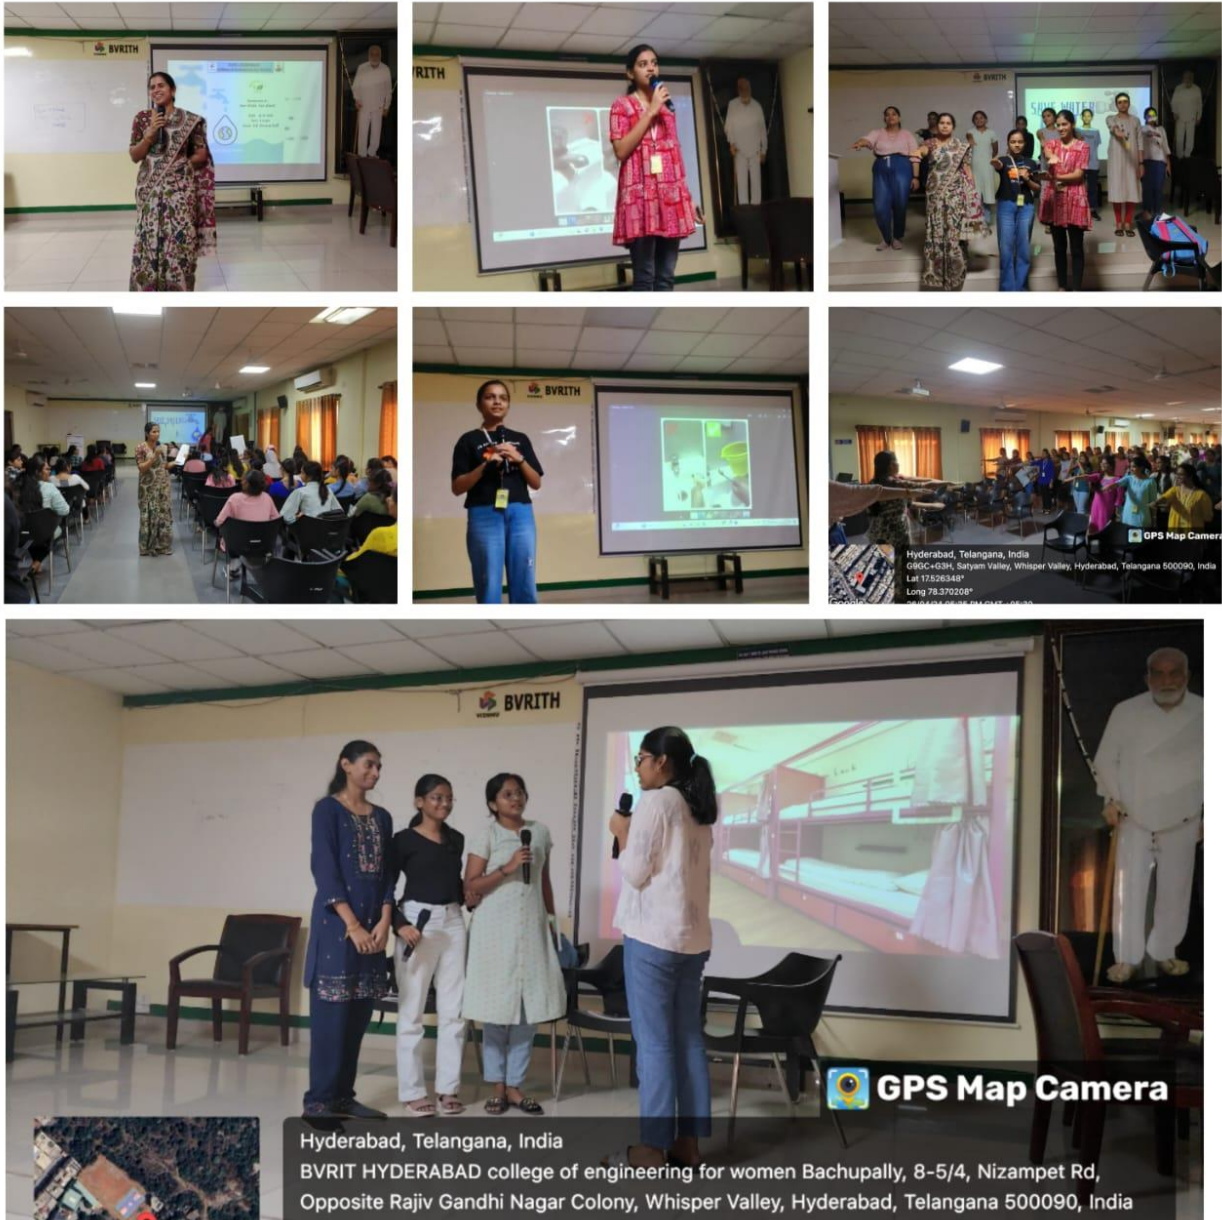

The session began with a warm welcome from the organizer. An icebreaker activity was conducted where students were asked about their water usage habits, such as whether they leave the tap running while brushing their teeth. This activity helped to engage the students and set the tone for the session.

Practical tips were provided on how students can save water in their daily routines. These included:

- Taking shorter showers
- Turning off taps while brushing teeth or washing hands
- Fixing leaks promptly
- Using water-saving fixtures and appliances

A short educational video on water conservation was screened to provide a visual and engaging summary of the key points discussed. The video emphasized the importance of individual actions in contributing to global water conservation efforts.

Students were asked to take a pledge to conserve water. A template for a personal commitment statement was provided, which they signed and displayed in their rooms as a reminder of their commitment to water conservation.
