Report: Promoting Sustainability through Hands-On Learning

As part of the Environment Day celebrations, the Nature Club & Rotaract Club of BVRIT Hyderabad, College of Engineering for Women organized a two-day Cloth Bag Making Workshop on June 5th and 6th. This event aimed to educate students about the environmental impact of plastic bags and encourage the use of sustainable alternatives. Over 30 students participated in the workshop, which provided them with hands-on experience in sewing and crafting their own cloth bags. On the first day, students were introduced to basic sewing techniques, including the use of sewing machines and hand-stitching methods. They also learned how to take personal measurements and cut the fabric accordingly, ensuring each bag met their specific requirements. Even plantation was done by Principal mam Dr.K.V.N .Sunitha mam and Director of Vedic Dr.Ravindra Babu Sir.

The second day saw participants advancing to more complex stitching techniques, learning how to add handles and pockets to their bags. Additionally, students enjoyed painting the college logos and creating personalized designs on their bags, adding a unique and creative touch to their projects. By the end of the workshop, each student had successfully created a personalized cloth bag, showcasing the practical skills they had acquired. This initiative not only equipped students with valuable sewing skills but also heightened their awareness of environmental conservation, reinforcing the club's commitment to promoting sustainable practices within the college community.
