**CSE - Young Promising  
Engineer Award (YPEA) for**

**Batch - 2020**

My time at BVRIT Hyderabad College of Engineering for Women was memorable and life-changing. It has taught me varied skills, developing me academically, professionally, and personally. The college has given me ample opportunities to excel and challenge my capabilities through research assignments, hackathons, clubs, and other activities. Being recognized for these achievements and efforts is an honor.

I was a part of the WISE program, which introduced me to a broader understanding of software development and played a key role in shaping me as a developer. Later, I was selected for the Women Engineers Program, offered by TalentSprint and supported by Google. The skills I acquired through these programs were invaluable. They helped me showcase my abilities in various hackathons, like the Micron SMAI hackathon, and paved the way for my invitation to Europe's most renowned hackathon, HackZurich 2023, where I stood as a finalist in both.

Our college has always believed in learning through experience, giving me the opportunity to be part of the research collaboration with Hexagon R&D India for nine months, working on a novel software system. Thanks to this experience, I was selected for the Target UpCurve Data Science program, where I focused on utilizing my skills for a real-world industrial problem. Carrying these learnings with me, I landed a four-month internship with Volvo Car Corporation at their headquarters in Gothenburg, Sweden. Moving to a new country could have been quite daunting; however, I managed to sort out the academic arrangements for these months through the encouragement of our college. I extend my gratitude to our principal ma'am and faculty.

These achievements would have been impossible without the unwavering support and guidance the college has provided. I am extremely grateful to our esteemed principal ma'am, Dr. K.V.N Sunita, and Head of the Department Dr. M. Sree Vani, as well as all the faculty members, staff, and friends who were there with me throughout this journey. Thank you, BVRITH, for believing in me, nurturing my potential, and filling me with the confidence to conquer the unknown.

# *Best Wishes*
